LUCA CECCATELLI

Senior Frontend Developer & AI Integration Specialist

Ceriano Laghetto (MB) • +39 351 9946410 • lucaceccatelli067@gmail.com • linkedin.com/in/luca-ceccatelli-7a305b5

PROFILE

Frontend developer with over twenty years of experience and a career built on staying one step ahead of technological change, most recently by integrating artificial intelligence into software development processes.

Currently Tech Lead of the Player/Online Video Platform team at Sky Italia, where I work on SkyPlayer, the HLS streaming player for Web and HbbTV and the company's core digital monetization tool through Google IMA/DAI and Freewheel.

On the AI side, I integrate agents and language models (Claude, GPT, Gemini, Copilot) into the development workflows of new and existing projects: I define the projects' AGENTS.md files, develop SKILL.md files to maximize automation, spread these practices across the team, and speak regularly about them at internal Tech Days.

Also active in open source with insert-coin, educational browser remakes of classic arcade games built in TypeScript together with Claude, and tado-widget, an Android widget for tado° thermostats.

Curious, pragmatic, and always an "evangelist" for emerging technologies within the teams I work with.

Used to working in international teams, I am available for full-remote roles internationally and for project-based consulting.

KEY SKILLS

- Frontend: TypeScript, React/Next.js, Redux/Zustand, Web Components, HTML5, CSS/SASS
- Video Streaming & Advertising/Monetization: HLS, HbbTV/OIPF, Google IMA, Google DAI, Freewheel
- Testing & Quality: Jest, Playwright, Selenium, Cucumber, Percy (VRT)
- AI Integration: Copilot, Anthropic Claude, OpenAI GPT, Google Gemini, Groq; defining AGENTS.md and developing SKILL.md files to automate development workflows, on existing and new projects
- Technical leadership: tech lead, mentoring, onboarding, code review, in-house training (JavaScript, TypeScript, React), speaker at internal Tech Days on AI agents
- Methodologies: Agile (Scrum, Kanban)
- CI/CD: Jenkins, GitHub Actions, Azure DevOps

PROFESSIONAL EXPERIENCE

Open-source Maintainer — Personal projects on GitHub

- **insert-coin** (github.com/DarkHelmet67/insert-coin): educational from-scratch browser remakes of six classic 1970s–80s arcade games (Space Invaders, Pac-Man, Galaga…) in TypeScript and HTML5 Canvas; pnpm monorepo with Vite, Vitest, and CI/CD on GitHub Actions. The project documents, step by step, development with Claude as an AI partner, including dedicated Claude Code skills
- **tado-widget** (github.com/DarkHelmet67/tado-widget): Android widget (Java) for tado° thermostats, with OAuth device-code sign-in, background refresh via WorkManager, and encrypted token storage

Freelance consultant (self-employed) until 2014; employed by IT consulting firms ever since, with company changes driven by the natural end-of-project cycle at client sites.

Tech Lead, FE Development & QA — Team Player/Online Video Platform — Aug 2024 – present

Sky Italia — Milan (permanent employee)

- Tech lead for the team: onboarding new hires, project documentation, and code review for team members
- Development and testing of SkyPlayer, the HLS streaming player for Web and HbbTV and Sky Digital's core monetization tool
- Built deep expertise in video advertising/monetization with Google IMA, Google DAI, and Freewheel
- Test automation with Cucumber, Selenium, and Playwright, alongside TypeScript as the main language
- Defined and maintained AGENTS.md files across the team's projects, giving AI agents an always up-to-date context and shared code-writing rules; developed SKILL.md files to maximize automation of development workflows
- Regular speaker at internal Tech Days on integrating AI agents into new and existing projects
- Tutor for in-house programming courses (JavaScript, TypeScript, React)

- Moved from external consultant to direct employee, in recognition of the team's technical contribution

FE Software/Application Developer — 2020 – 2024

NTT Data (consulting, on-site at Sky Italia)

- Developed the Design System and GraphQL/WebSocket real-time components for the LiveData team
- Built React Web Components with unit testing (Jest) and Visual Regression Testing (Percy)
- Developed test automation for the new SkyPlayer

FE Software/Application Developer — 2016 – 2020

NTT Data

- Chili TV: built the new Smart-TV streaming WebApp in JS/React
- ContactLab SpA: developed Web Components (Polymer/TypeScript/React/Redux) for the Marketing Cloud, in an Agile/Scrum environment with E2E testing (Selenium, Nightwatch, Cucumber, TestCafe, BrowserStack)
- OmniaLabs: developed test automation for Vodafone Lab

Software/Application Developer — 2014 – 2016

Bi-Technology SA

- Developed Android apps (Java) for Vimar By-Clima and for Widiba ("My Money" and "SuperApp")

Software/Application Developer — 2014

Ogilvy & Mather — Milan

- Built the new Carrefour Italia website in Drupal
- Maintenance of the Giochi Preziosi, Nestlé/Purina, and Lactalis/President websites

Partner, Web and Mobile Developer — 1999 – 2013

ALG Consulting srl — Milan

- Web development (ASP, SQL Server, PHP, MySQL, JavaScript, HTML5, CSS3) and on Joomla/Drupal/WordPress CMS platforms
- Desktop app development (VB6/VB.NET, Java) and Android mobile development, including the "New Taxi Driver" app
- Notable projects for Unilever, Mediobanca, Banca Mediolanum, and the Varta Batterie group, including a year (2001) at Unilever's London office — the starting point of a career spent in international teams ever since

EDUCATION

Università degli Studi di Milano — Computer Science
Politecnico di Milano — Computer Science track
Liceo Scientifico G.B. Grassi, Saronno — Scientific High School Diploma

LANGUAGES AND ADDITIONAL INFORMATION

Italian: native speaker • English: excellent level (reading, writing, speaking)
ITIL certification • Category C driving licence, own car
